
SJCC - Utility Upgrades

San Jose, CA

OWNER San Jose Community College District

ARCHITECT Salas O'Brien

YEAR COMPLETED 2013

This project consisted of extension of the campus electrical distribution to replace existing PG&E feeds to existing buildings and install provisions for connections to future buildings. It included installation of new underground infrastructure, medium voltage cabling, switches, transformers, switchgear, distribution panels, and repairs to landscaping and roadways. Also included was relocation of sanitary and storm sewers, new connections to heating water, chilled water and gas for future buildings.
