Healthcare

STRUCTURAL ENGINEER

Biggs Cardosa Associates

Build Group did site work and a seismic retrofit for this 15,000+ SF health center. The project included creating private offices, cubicle spaces, reception areas, patient rooms, and employee amenities. Castro Mission Health Care is a primary care clinic that serves thousands of patients in the Castro/Mission Districts in San Francisco, so completing their product to budget and scope was a huge win for our client and their patrons.
