
John Muir Women's Outpatient Remodel

Walnut Creek, CA

OWNER John Muir Health
Systems

ARCHITECT Harley Ellis Devereaux

YEAR
COMPLETED 2016

This project consisted of removal of the existing 2,500 SF women's services space. It included renovation of the existing waiting room and exam rooms into new exam rooms and office space for mammography and tomography services. Our team maintained infection control protocols to protect adjacent occupied departments. We coordinated shutdowns for domestic hot / cold water, medical oxygen and vacuum, and HVAC systems.
